FIRE PROPERTIES OF ELECTRIC CABLES USED IN BUILDINGS

Instytut Techniki Budowlanej

Warsaw 2023

EDITORIAL COMMITTEE

Editor-in-chief	Prof. PhD Eng. LECH CZARNECKI, Dr h.c.
Deputy editors-in-chief	Prof. PhD Eng. LESŁAW BRUNARSKI PhD Eng. JADWIGA FANGRAT, Prof. of ITB
Secretary	PhD MICHAŁ GAJOWNIK
Board Members	PhD Eng. JACEK NURZYŃSKI, Prof. of ITB MSc Eng. JAN SIECZKOWSKI PhD Eng. EWA SZEWCZAK PhD Eng. SEBASTIAN WALL

Reviewers

PhD Eng. ANDRZEJ PLICHTA, Prof. of PW
Senior Brigadier Prof. PhD MARZENA PÓŁKA

Editor

PhD MICHAŁ GAJOWNIK

Contents

<i>Summary</i>	7
From the Author.....	11
Terms and definitions	13
List of abbreviations and Greek characters	15
1. Introduction	17
2. Role and functions of electric cables in buildings	23
3. Current state of knowledge on fire behaviour of electric cables	27
3.1. Electrical installations and cables	27
3.2. Fire spread in buildings as a result of cable fires.....	29
3.3. Cable fire testing.....	30
3.4. Fire tests in microgravity	32
3.5. Numerical simulations of cable fires.....	34
3.6. Fire effluent toxicity	37
4. Scientific problem.....	43
5. Constructional and material parameters of studied cables	47
6. Experimental methods	59
6.1. Large-scale cable experiments.....	59
6.2. Small-scale cable experiments	61
7. Fire properties of studied cables	69
8. Analysis of the relationship between constructional-material parameters and the fire properties of electric cables	79
8.1. Tests results and discussion for a large number of cables of various construction.....	79
8.2. Statistical analysis.....	111
9. Discussion on the current cable parameter χ	115
10. Author's concept of new cable parameter	119
11. Application of Quintiere's theory	127
12. Conclusions.....	133
References	135
